

Wireless Mouse BT & 2.4G

FCC WARNING STATEMENT

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

- -- Reorient or relocate the receiving antenna.
- -- Increase the separation between the equipment and receiver.

 -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. which the receiver is connected.
- -- Consult the dealer or an experienced radio/TV technician for help This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1)this device may not cause harmful interference, and (2)this device must accept any interference received, including interference that may cause undesired operation.

PRODUCTS FEATURE

power is supported.

Wireless Mouse BT & 2.4G

Wireless Mouse BT & 2.4G

CONNECTION WITH THE COMPUTER-BT or 2.4G wireless connection

3. Turn the toggle switch at the bottom of the mouse to the BT or 2.4G position

4. When the toggle switch at the bottom of the mouse is turned to the BT position: first, press and hold the pairing button at the bottom of the mouse for 3 seconds, and the mouse will enter the Bluetooth pairing mode (the status indicator will flash quickly, and the waiting time for pairing is about 2 minutes). Then, depending on the terminal device that needs to be paired, follow the corresponding steps to match the mouse, the status indicator will be on for 2 seconds, and the pairing in Bluetooth mode of the mouse will be successfull.

5. When the toggle switch at the bottom of the mouse is turned to the 2.4G position: first, press and hold the "Left+middle+right" button of the mouse for 3 seconds, and the mouse will enter the 2,46 pairing mode (the status indicator will flash quickly, and the waiting time for pairing is about 20 seconds), and then insert the sub-miniature(Nano) receiver into the USB interface of the host. The status indicator will be normally on for 2 seconds, and the pairing of the mouse in 2.4G mode will be successful

6. After the above steps, the mouse can be in Bluetooth or 2.4G mode. (the status indicator of the product: blue indicator in Bluetooth mode and red indicator in 2.4G mode).

DPI During the process: flash only one time at 800 DPI; two times at 1200 DPI; three times at 1600 DPI; four times at 2400 DPI; five times at 4800 DPI.

LOW BATTERY TIPS

As the time of using mouse goes by, the voltage of the battery will slowly decrease. When it is lower than the set reminder voltage of 1.0V during the use of the mouse (the status indicator of mouse flashes once every 1 second), after the use of the mouse is stopped, the status indicator of the mouse will flash 10 times and then go out, reminding you to replace the battery in time.

Wireless Mouse BT & 2.4G

AUTOMATIC SLEEP AND COMPLETE SHUTDOWN FUNCTION

The mouse will enter the standby power-saving state when it is not used for 30 minutes. Press any button, the mouse will be woken up for using again. If you take the mouse out or do not use it for a long time, toggle the power switch at the bottom of the mouse to the OFF state.

WARM REMINDER: Please remove the battery when not using the mouse for a long time, so as not to corrode the parts.

RECEIVER COLLECTION FUNCTION

Portable Nano receiver can be placed in the storage interface at the bottom of the mouse.

RECONNECTION

The wireless mouse may disconnect with the receiver due to high temperature and high magnetic field. In this case, you have to reconnect them.

Note: Before pairing the mouse, you must make sure that your computer has a Bluetooth adapter and its driver has been installed. Refer to the instructions in the user manual of the adapter for installation of the adapter driver. It is recommended that a brand-class adapter be used, otherwise a compatibility problem may occur.

CAUTIONS

- 1. In wireless mode, the data transmit by 2.4GHz radio waves, the linear using distance is up to 10 meters, which could be reduced if there are large obstacles or environmental interference.
- 2. The performance of the mouse may also affected by uneven, reflective desktop.
